EDUCATION

Bachelor of Computer and Information Systems Security (Cybersecurity) **May 2026**
Purdue University West Lafayette — Polytechnic Institute | Minor: Forensic Sciences

TECHNICAL PROJECTS

CNIT 470 — Security Operations & Threat Detection Environment

- Investigated 5 simulated cybersecurity incidents involving web defacement, credential theft, privilege escalation, persistence, and lateral movement across Linux, Windows, and Active Directory environments.
- Utilized Wazuh, Suricata, and Velociraptor to analyze security logs, identify indicators of compromise (IOCs), investigate suspicious authentication activity, and reconstruct attack timelines.
- Mapped attacker tactics, techniques, and procedures (TTPs) to the MITRE ATT&CK framework, identifying security misconfigurations, unauthorized account creation, and persistence mechanisms.
- Developed incident response playbooks and security recommendations focused on containment, least privilege, multi-factor authentication (MFA), network segmentation, and improved threat detection.

CNIT 455 — Simulated Enterprise Firewall Environment

- Built a simulated enterprise network with four segmented VLANs across eight VMs, using PfSense and VyOS firewalls to apply defense-in-depth principles and secure configuration baselines.
- Implemented PacketFence NAC in-line for validating endpoint authentication, policy-based access control, and unauthorized device isolation.

CNIT 512 — Physical Security & Access Control Assessment

- Led an authorized physical security risk assessment of a professional sports venue, uncovering four distinct access control gaps in restricted and employee-only areas, then delivered a formal risk assessment report.

CERTIFICATIONS

- CompTIA Security+ **October 2026**
- ISC2 Certified in Cybersecurity (*CC*) **May 2026**
- Google Cybersecurity Professional Certificate **January 2026**

PROFESSIONAL EXPERIENCE

Network Security Operations & System Administrator **Jan 2025 – May 2026**
Purdue IT, Indiana, USA

- Monitored and secured network infrastructure across 160 buildings, using Wireshark for traffic analysis and troubleshooting VLANs, DHCP/DNS, and switch configurations to identify and resolve connectivity and security issues.
- Led a telecommunications room standardization project spanning 1,000+ rooms, managing six interns and developing documentation that improved ticket efficiency by 13%.
- Configured and deployed 300+ PoE phones, Cisco devices, and Dell networking equipment, maintaining reliable, secure communication services across departments with minimal downtime.
- Supported Purdue's ISO 27001 certification through documentation reviews, compliance verification, and process alignment across IT operations.
- Contributed to creating Active Directory Group Policies (GPOs) to standardize and enforce password policies and device configurations.

SKILLS

Security Operations: SIEM & Log Analysis, Incident Response, Threat Detection, Alert Triage, Digital Forensics
Network & Access Security: Network Security, Firewall Configuration, Access Control, VLANs, DHCP/DNS
Systems: Linux, Windows Active Directory
Security Tools: Wazuh (SIEM), Suricata (NIDS), Velociraptor (EDR), Wireshark, Nmap, pfSense, VyOS, VMware, Nutanix
Frameworks & Standards: MITRE ATT&CK, NIST, ISO 27001. Familiarity with NCA ECC, SDAIA PDPL
Languages: Arabic (Native) & English (Fluent)
